REGIONAL HEARING FOR 32 FEDERAL MARKETING ORDERS

The U. S. Department of Agriculture held a regional public hearing in Kansas City, Missouri, on January 26 on proposed elimination of seasonal pricing of fluid (Class I) milk under 32 Federal milk marketing orders.

The hearing was requested by associated dairy-men representing milk producers serving 28 of the markets, and dairy farmer cooperatives in the other four markets asked that the issue also be considered for their Federal order markets.

Consumer and Marketing Service officials said all persons interested, including dealers, dairy farm-

ers, and consumers, are invited to attend the hearing and present testimony.

The dairy farmers propose amending the orders to use a single Class I differential in all months of the year in place of the varying seasonal differentials which are now added to the basic formulas to compute Class I prices. The basic formulas in the orders reflect average monthly values of manufacturing grade milk purchased by Minnesota-Wisconsin dairy processing plants.

Included in the regional hearing was the Milwaukee, Madison and Northeastern Wisconsin orders.

The Audit Function of Federal Milk Market Administrators

H. L. Forest, Director, Dairy Division, AMS, USDA

The Federal milk order program has been in effect a little over 30 years and has grown on a voluntary basis as dairy farmers in various parts of the nation have felt the need for Federal participation in "regularizing" the conditions under which Grade A milk is sold by farms to milk dealers. In the mid-1940's approximately 15 billion pounds of milk were marketed through plants regulated under Federal orders. *Last year — 53 billion pounds of milk — almost half of the nation's total milk delivered to plants and dealers in the country was delivered to plants regulated under Federal orders.*

Each Federal order market has individual characteristics which necessitate some differences among provisions in the respective orders. However, each order has a common framework based on the statute; namely, a classified price plan, minimum class prices, a method of pooling proceeds from sales in the respective classes, and provisions relating to order administration. And, of course, each order is formulated on the basis of evidence introduced at a public hearing at which producers, han-

dlers, consumers, and other interested parties may present testimony.

Each order is administered by a market administrator who is an agent of the Secretary of Agriculture. His principle duty is to assure that the order is applied impartially and uniformly to all handlers. To accomplish this he must assure himself that handlers account accurately for milk receipts and sales and make payment to producers in accordance with the provisions of the order.

The words "impartially" and "uniformly" are vital in describing the impact of an order on regulated handlers. Let's go back a few years to the early 1930's and see why.

Early Classified Price Plans

Prior to this, cooperative associations and handlers in several fluid markets had developed and were using a classified price plan. However, some producers and handlers could not be persuaded to join in the programs;

(continued on page 8)

* Subject to location differentials where applicable. In the case of members of approved cooperatives, these prices are subject to the deductions authorized by the associations. The prices listed do not include any premium payments which may be paid by handlers and which may bring actual payments in excess of the minimum requirements.
